

AVIOR GOLD

— COMBINED POWER —

- ✓ Dual mode of action
- ✓ Protects new growth
- ✓ Curative & protective

AVIOR GOLD is a dual mode of action fungicide for use in wheat and barley. It has both curative and preventative activity for control of cereal diseases.

Kenso Agcare AVIOR GOLD cereal fungicide combines the curative activity of epoxiconazole and the preventative power of azoxystrobin.

It contains a unique liquid formulation of 120g/L Azoxystrobin & 100g/L Epoxiconazole providing outstanding control and prevention of major economic cereal diseases.

Together we grow

BEST USE TIPS

Apply when conditions favour disease development and prior to development of disease in the crop

Thorough coverage of the crop is necessary for best results

Do not apply more than 2 applications of AVIOR GOLD fungicide in any one season on the same paddock

Being an SC product ensure spray tank is half filled and agitating before adding AVIOR GOLD

Continue agitating while topping up tank and during spraying

WHEAT

DISEASE	RATE PER HECTARE
Stripe Rust (<i>Puccinia striiformis</i>)	313ml to 625ml
Septoria nodorum blotch	313ml to 625ml
Leaf Rust (<i>Puccinia recondite</i> , <i>Puccinia triticina</i>)	625ml
Powdery Mildew (<i>Blumeria graminis</i> f.sp. <i>tritici</i>)	313ml

BARLEY
