

# KEN-PAM 423

## Soil Fumigant

Kenso Agcare has over 45 years of experience in agricultural chemical manufacture and formulation, KEN-PAM 423 has been successfully and consistently supplied to the Australian market since 2012.

### BEST USE TIPS

1. Recommended application methods are Soil Injection, Rotary Tiller and Trickle Irrigation.
2. Cultivate soil and dispense of clods. Keep soil moist until application.
3. Do not apply to dry soil.
4. Covering the treated surface with impermeable polythene sheeting ensures better retention of the active gas thus better results.
5. Do not exceed application rates detailed in Product Label.
6. Do not mix with any other pesticide or fertilizer.
7. Do not apply in high wind situations.
8. Do not apply KEN-PAM 423 in low humidity conditions and when temperature is above 32° C.
9. Always follow Label guidelines for application rates and methods.
10. Always be vigilant with the handling of KEN-PAM 423.
