

METOKEN GOLD

— THE REAL DEAL —

- ✓ Double activity
- ✓ Resistance fighter
- ✓ Grass controller

METOKEN GOLD from Kenso is a true single isomer metolachlor for the control of a range of grasses and broadleaf weeds in sugar cane, canola, sorghum and other crops.

The 960-g/L S-Metolachlor formulation results in a lower application rate than older metolachlor formulations meaning less handling, storage, freight costs.

Residual pre and post application herbicide for use in plant and ratoon cane.

BENEFITS

- High strength S-isomer formulation
- Pre-emergent weed control
- Twice the activity of standard 720gm formulations
- Tank mixes with other key pre-emergent herbicides
- Controls key grass species
- Group I herbicide for resistance management

BEST USE TIPS

- Study label rates as they are half the old metolachlor formulations
- Sufficient rainfall or incorporation is needed within 10 days to move the product to 3-4cm soil depth for consistent results
- Apply in 60-120L of water per hectare
- Apply to moist but not waterlogged soils
- Only use on Sorghum treated with Concep II seed safener
- Adhere to label warnings on particular crops
